

November 4, 2021
3:00 pm
Via ZOOM (Online)

Attendance:

- | | | |
|-------------------------------|----------------------------|----------------------------------|
| Alistar Wilson, CNRL | Debbie Gastonguay, CCCW | Lyle Leadley, Keyera |
| Bettina van Nieuwerkerk, CWLC | Eric Berg, AER | Murray Welch, Community |
| Billy Joe Jensen, Pieridae | Evan Kluk, Secure Energy | Preston Seier, TC Energy |
| Brianna Laskosky, Student | Glenn Miller, Ram Coal | Rose Marie Sackela, Community |
| Cole Thomson, TC Energy | Jeff Lennard, Community | Spencer Sinclair, Paramount |
| Corporal Cuneyt Zambak, RCMP | Jerzey Maslanka, Community | Thalia Aspeslet, Pieridae |
| Darcy Allen, FAO | Jesse Kirillo, Repsol | Vanessa Cartwright, Keyera Corp. |
| Darren Boyer, Lightcatch | Judy Winter, Community | Rick Anderson, Facilitator |
| Deb Skeels, CCCW | Ken Brophy, Ram Coal | Dawn Thomas, Note taker |
| Debbie Baich, Town of RMH | Ken Hewitt, Community | |

Introductions:

REVIEW AGENDA:

- Reviewed & approved

REVIEW MEETING NOTES:

- Reviewed October 7, 2021 meeting notes; Approved

UPDATES/ACTION ITEMS:

- **Joint Public Information Session for 2022 – Renewables**

There has not been a lot of progress made on this. Still in the discussion phase with different folks and making contacts.

Rick has talked to the facilitator of Central Alberta Synergy (CAS) and plans to attend their next meeting and will find out then if they are interested in participating.

MEMBER UPDATES/IN THE NEIGHBORHOOD:

Members present gave verbal updates. Only written updates submitted are included in the meeting notes. Attendees shared activity updates, and information about local events. Please provide any written updates to Rick via email (rick@rickandersonconsulting.com)

WRITTEN UPDATES:

Repsol

Repsol would like to notify you that we have granted permission for Yangarra Resources to utilize 100,000m³ of water from our water storage site located at SW 3-38-7W5M. Yangarra is required to apply for a Temporary Diversion Licence to the Alberta Energy Regulator to utilize this water source. The water will be used for hydraulic fracturing operations for their proposed wells on their pad located at 7-28-37-7W5M. Yangarra is proposing to begin their hydraulic fracturing operations on or around November 11th 2021. Temporary above ground hoses will be used to transport the water and they will begin laying the hoses and pumping water ahead of their frac date (in early November). This is an opportunity for industry collaboration and helps to reduce and mitigate industry's overall footprint.

Repsol has not had any new development activity in 2021 and at this time, we do not have any new development activity planned for early 2022. We will continue to keep you updated on any new development plans.

AER

News Release 2021-10-21 - [AER lays charges against Tidewater Midstream and Infrastructure Ltd.](#)

The Alberta Energy Regulator (AER) has laid charges against Tidewater Midstream and Infrastructure Ltd. for a release of acidic water that flowed into a nearby creek. The release occurred in October 2019 at Tidewater's Ram River sour gas processing plant near Rocky Mountain House.

[Earthquake in Rocky area 2021-10-21 - Alberta Geological Survey - Earthquake Dashboard](#)

[Bulletin 2021-41 - New functionality moving to OneStop](#)

Well Directional Surveys - Licensees will be required to submit directional survey data using new directional survey templates (.xlsx or.csv). These templates will be available on the OneStop landing page on November 4, 2021 or by contacting the AER's Customer Contact Centre prior to November 4, 2021.

We will host virtual training sessions on how to submit directional survey data through the OneStop platform. More details, including registration, can be found on the [Events](#) page. A new quick reference guide (QRG) will be posted on the [OneStop landing page](#) to support directional surveys.

If you have questions about OneStop or this bulletin, contact the AER's Customer Contact Centre by phone at 403-297-8311 (1-855-297-8311 toll free) or by email at inquiries@ aer.ca.

[Bulletin 2021-42 - New Contamination Management Manual](#)

The purpose of this manual is to assist industry in understanding the regulatory requirements and expectations for remediating contamination related to oil and gas, in situ, and pipeline activities regulated by the Alberta Energy Regulator (AER).

[Stay Informed:](#)

The business of making sure that energy development happens safely can be complex. To help bring clarity to these complexities, the Alberta Energy Regulator created Resource, our website for sharing stories and videos on energy development and how its regulated in Alberta.

PRESENTATION(S):

- **Bursary Wrap Up – Brianna Laskosky**

Brianna gave a brief verbal update on her experience with the West Central Stakeholders synergy group as the student member for 2020-2021. She shared her experience in seeing the value of building relationships and in collaboration. She gave some examples of how she is using these experiences as she goes forward in her career and in working with fellow students on projects.

- **Lightcatch App – Darren Boyer**

Darren Boyer (founder of Lightcatch) gave a slide presentation with an overview of the Lightcatch App. The app is free and is available to the public for reporting/tracking potential stolen property or criminal activities in real-time, and has proven to be effective

Darren gave an explanation of how the app works, and gave examples of some of the positive results achieved. He also discussed some of the features that are built in to help maintain privacy where required.

Corporal Zanbak from the RCMP detachment in Parkland County gave some of his thoughts on the app and his encouragement for people to utilize it. While the app is not an official tool of the RCMP, some have downloaded it personally.

Several of the industry members were interested in taking the information back to their companies for further discussion. Darren will provide his presentation to Rick to circulate to the industry members and anyone else that might be interested.

DISCUSSION ITEMS:

- **Crime Committee**

Discussion regarding a hosting a focused meeting drawing crime watch groups, synergy, industry, RCMP, and other groups who have interest in rural industry issues in our communities. This initiative would be looking a developing a synergistic approach to sharing information, learning, and potential tool. It was suggested that WCS as a synergy group would be an obvious proponent of the idea. It was also noted that the issue is a community issue and all WCS members are part of the community, and we are all impacted by it. The general consensus was that there would be interest in having a meeting focused on this topic. Rick will move forward with this initiative.

- **Induced Seismicity**

Eric Berg gave a brief presentation regarding the earthquake that was reported in October in the Rocky Mountain House area. He indicated that given the depth of the epicenter of the quake (approx. 9 kms below the surface), it is being classed as natural occurring and not induced by industry activity. He shared the AER website and where this data is housed and tracked. There was a lot of interest in this topic and some questions specific to industry activity and proximity to where the epicentre of the earthquake was reported. Eric has offered to be available for any questions regarding this.

Next Meeting(s): December 2, 2021 (via ZOOM) 3:00-5:00 pm
